It became the 15th local-language edition when it was launched in December 2010. The magazine is also available in China, Spain, Russia, the Netherlands, Israel, Poland, Latin America, Armenia, Czech Republic, Croatia, Indonesia, Romania and South Africa. National Geographic Traveler (USA) is the world's most widely read travel magazine, created in 1984. It championed sustainable travel before it was cool and, eight times annually, celebrates journeys that are about place, experience, culture, authenticity, living like the locals and great photography. It makes a distinction between tourism and travel and stresses inquisitive, not acquisitive, trips. It employs storytelling and outstanding photography to inspire readers to pick up and go, eschewing fashion and fluff in favour of articles that offer a strong sense of place, inspiring narratives that make readers take trips, and solid service information to help them plan those trips.

The National Geographic Society is one of the world's largest nonprofit scientific and educational organisations. Founded in 1888 to "increase and diffuse geographic knowledge," the Society's mission is to inspire people to care about the planet. National Geographic reflects the world through its magazines, television programs, films, music and radio, books, DVDs, maps, exhibitions, live events, school publishing programs, interactive media and merchandise. National Geographic magazine, the Society's official journal, published in English and 33 local-language editions, is read by more than 40 million people each month. The National Geographic Channel reaches 370 million households in 34 languages in 172 countries. National Geographic Digital Media receives more than 15 million visitors a month. National Geographic has funded more than 9,600 scientific research, conservation and exploration projects and supports an education program promoting geography literacy.
